Profile

Applied Data Science MSc graduate with a First-Class BSc in Business Management (Business Analytics), combining Python, machine learning and data analysis with commercial, customer-facing and leadership experience. Interested in junior data, analytics, reporting and business roles where data can be used to solve practical business problems.

Skills

Data & Programming: Python, PostgreSQL, pandas, NumPy, scikit-learn, PyTorch
Machine Learning: Regression, Random Forest, Gradient Boosting, model evaluation
Business & Analytics: Data analysis, reporting, Excel, business analytics, stock management
Languages: English, Lithuanian, Spanish, French

Experience

Customer Assistant, Tesco – Swansea, UK **2022 – Present**

- Monitor stock levels, product availability and stock discrepancies within a high-volume retail environment.
- Manage replenishment and rotation of high-demand and fresh products to maintain availability and minimise waste.
- Work across multiple store departments, adapting quickly to different operational requirements.
- Support customers while balancing service quality with time-sensitive operational tasks.

Teaching Assistant, Swansea University – Swansea, UK **Sep. 2023 – Dec. 2023**

- Supported undergraduate students during Operations Management seminars, explaining quantitative and analytical concepts and guiding students through practical exercises.
- Assisted students with decision-tree analysis, capacity planning, inventory and aggregate planning, including interpreting calculations and applying results to business decisions.
- Guided students through applied business case studies covering logistics, Lean/JIT operations, process efficiency and operational problem-solving.

Student Union President, Gower College Swansea – Swansea, UK **2019 – 2021**

- Led a 55-member student representative team across five college campuses.
- Collected and analysed student feedback through college-wide surveys involving over 1,000 responses.
- Presented findings and student priorities to senior management and the college governing board.
- Contributed to projects focused on sustainability and improving inclusion across the college.

Projects

Predictive Process Monitoring – MSc Dissertation **Python / Machine Learning**

- Analysed real-world business process event-log data to predict the remaining completion time of active process cases.
- Built and evaluated Ridge Regression, Random Forest and Histogram Gradient Boosting models using MAE, RMSE and R^2.
- Engineered temporal, categorical and process-history features using Python, pandas, scikit-learn and process-mining techniques.

Education

Swansea University – MSc Applied Data Science **2026**
Swansea University – BSc Business Management (Business Analytics), **First Class** **2025**
Gower College Swansea – BTEC Level 3 Business, **Distinction*** **2022**
